

KELECHI J. CHIEMEKA

Full-Stack Software Developer | Cloud Engineer

Abuja, Nigeria
+234 703 055 2735
Kebleinsyt23@gmail.com
www.kebleinsyt.com.ng

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 4+ years of experience designing and shipping production-ready web and mobile applications. Proficient across the entire development stack - from designing responsive, accessible UIs with React and Next.js to architecting robust REST APIs and database schemas using Node.js, PHP/Laravel. Proven track record managing end-to-end lifecycles for complex platforms including multi-tenant SaaS dashboards, inventory systems, and fintech products. Thrives in remote-friendly environments and consistently ships clean, maintainable, highly optimised code.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS, Laravel Livewire / Inertia
Backend	Node.js / NestJS, PHP / Laravel, Go / Gin
Mobile	React Native
Databases	PostgreSQL, MySQL, MongoDB
Cloud & Tools	VPS, Docker, Git / GitHub, RESTful APIs, CI/CD Pipelines, Performance Optimisation

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Jan 2021 - Present

KebleInsyt Technologies (kebleinsyt.com.ng)

- Architected and deployed 10+ full-stack web and mobile applications, consulting directly with clients to scope requirements and define technical deliverables.
- Optimised application load times and runtime performance by up to 40% through aggressive code splitting, lazy loading, and database query tuning.
- Managed end-to-end project lifecycles - from initial wireframing to cloud deployment (VPS) and post-launch maintenance, ensuring 99.9% application uptime.
- Built fully responsive, cross-browser-compatible UIs that increased client user engagement and retention.

Product Assistant | Asst. Proj. Manger - Software

Oct 2019 - Dec 2020 |

Applied Logic Ltd (BroadstreetLagos.com)

Present

- Administered web platforms and backend operations supporting multiple products with 2000+ monthly active users.
- Developed automated scripts to analyse quarterly and annual reports on NGX/SEC-listed entities, surfacing actionable financial insights for key stakeholders.
- Collaborated directly with the core engineering team to spec, test, and ship 12+ new platform features.
- Resolved escalated technical customer issues, reducing average complaint resolution time by 35% and boosting client satisfaction scores.

Customer Support & Network Technician

Oct 2018 – Oct 2019

Dotmac Technologies (dotmac.ng)

- Monitored customer CPEs in real-time via an NMS, proactively identifying and mitigating outages before client escalation.
- Configured and installed network infrastructure including radios, managed switches, and routers across 50+ sites.
- Contributed to critical service reliability improvements, increasing overall network uptime by 15% across managed enterprise networks.
- Delivered Tier-2 technical support to end-users, rapidly diagnosing and resolving complex connectivity issues.

SELECTED PROJECTS

ProLearner	Multi-tenant SaaS school management & LMS platform with tenant data isolation and RBAC, built on Next.js and Laravel 12 – in development
SafeTravels	High-performance travel booking engine in Go + Next.js, integrating Amadeus and Travu APIs for real-time inventory, pricing, and secure transactions - in development
PatsyBoutique	Custom Ecommerce & inventory system capable of 1,000+ daily transactions with real-time stock tracking and sales reporting built with Inertia/React and Laravel 12
AccomodationHub	Nextjs Powered Saas market place / listing service for hospitality businesses
Vendora	Multi-tenant sector-aware website as a service with tenant data isolation and RBAC, built on Next.js and NestJs with exciting features like Escrow support, website builder , POS , etc – in development
MCN Cathedral Web Platform	Legacy-to-Laravel migration of a church management system with a secure subdomain admin dashboard and automated donation integrations.

EDUCATION & CERTIFICATIONS

M.Sc. Information Systems Technology	2025 – 2026
<i>National Open University of Nigeria</i>	
B.Eng. Computer Engineering — Second Class Upper	2012 – 2017
<i>Michael Okpara University of Agriculture, Umudike</i>	
AWS Solutions Architect - Associate (in progress)	2026
